

IMPORTANT ANNOUNCEMENT

Simulation Version 1.5 and 2006 Testing Schedule

Beginning on April 1, 2006, upgraded software (Simulation version 1.5) will be implemented on the Uniform CPA Examination. This software will provide a more seamless and intuitive way for candidates to navigate through simulations. It will NOT affect examination content.

To demonstrate the new functionality, a new tutorial and sample tests have now been posted to the CPA Examination website, www.cpa-exam.org (under Prepare for the Exam/Tutorial and Sample Tests.) Meanwhile, the original tutorial and sample tests remain available for the candidates testing in the current (January/February 2006) testing window.

The two sets of sample tests/tutorial are:

- The new (version 1.5) - to be reviewed by candidates planning to test ON OR AFTER April 1, 2006.
- The original (version 1.0) - to be reviewed by candidates testing BEFORE April 1, 2006.
